EXPERIENCE

ECRM System Using Cloud Computing Algorithm

October 2023 – December 2023

Designed and implemented a cloud-based enterprise customer relationship management (ECRM) system using AWS services, resulting in a 30% increase in customer satisfaction and a 20% reduction in operational costs. The system leveraged serverless architectures and automated deployment pipelines to enhance scalability, security, and cost-efficiency. Collaborated with cross-functional teams to migrate legacy applications and data to the cloud, enabling real-time data processing and boosting data accessibility for business analysts by 40%.

ECRM System Using Cloud Computing Algorithm

October 2023 – December 2023

Additionally I, with my fellow teammates and faculty members, worked on a research paper based on the same topic as the mini project. It was a tremendous learning experience for me.

PROJECTS

Personal Portfolio

➔ This is a great Showcase of my Front-End Development abilities. I used HTML, CSS & JavaScript to create this portfolio.
➔ This is a Responsive site which works for both Mobile phones and Computer Devices.
